

CIASA Manifesto

Given that the majority of the established political parties in SA are either Socialist, Marxist/Communist on the one hand or neo-Liberal on the other hand, with a sprinkling of far right Christian and Muslim reconstructionist parties and a few that are ethnic nationalists, after considerable engagements with SA'ns across the country, we adopted the centre right CONSERVATIVE ideological approach which led to the birth of the CIASA.

Over the last 10 months, we are happy to confirm that we have successfully completed the name change process from the People's Alliance - PAL to Conservatives in Action - CIASA,

This process, apart from a complete revamp of our logo & colours, enabled us as the Leadership of CIASA to adopt an ethos which espouses:

- National Reconstruction,
- Nation Building,
- Family values,
- National Reconciliation,
- Strong Conservative values,
- Property rights,
- Minority rights
- Individual rights interspersed with ideals of Communitarianism,

SA'ns from all walks of life, small to medium businesses in the main, are feeling the effects of a weak economy, an ineffective Govt, exacerbated by:

- The after effects of the deadly looting & rioting in July 2021,
- The devastating Floods in KZN in April 2022 resulting in areas like Tongaat for example who have had No piped water into their homes for just on 200 days as @ 31 October 2022,
- 'Corruption on a grand scale' never before seen in SA.
- Unprecedented fuel and energy price hikes including the repetitive interest rate hikes in 2022.
- The unacceptable levels of load shedding,
- A weak economy exacerbated by a weak currency, an oligopolistic economy, controlled by a few,
- A huge % of dysfunctional municipalities, many of whom are dependent on Govt bailouts,
- Ineffective, lethargic Municipal Councils, a number of whom are governed by political parties who's only interests are control of resources and political power at all costs,
- We witness the decline of Govt services in all Govt dept's,
- Unacceptable levels of unemployment,
- Spiralling energy costs, viz, fuel and electricity,

What we witness in SA today can only be termed as absolute 'waste of time Coalition Govt arrangement' where 'jostling for control and political power' is now at the centre of their scope, with infrastructure and basic services falling apart, viz,

- Breakdown of sewerage infrastructure with rivers, dams and beaches flooded with sewage,
- lack of clean drinkable piped water to homes and water leaks literally, everywhere,
- failure to provide housing with informal dwellings springing up, everywhere,
- poor roads and sidewalks with horrendous potholes in places because of poor workmanship to our roads,

- poor administrative municipal services, billing as an example,
- beaches and dams closed because of sewer pollution that have high levels of ecoli,
- poor refuse removal services,
- unkempt parks and recreational facilities,
- upkeep of cemeteries literally non-existent,
- street lights not working,
- streets and sidewalks that are filthy,
- hardly any Metro Police on the beat, patrolling,
- municipal pool infrastructure that is poor,
- municipal inability to enforce by laws,
- A public health, social welfare, Policing and education system in decline,
- Govt mortuaries that are literally dysfunctional, it is so bad,
- Overcrowded prisons,
- A justice system that is expensive and favours the wealthy and has long delays before cases go to trial,
- Porous borders,
- A weak intelligence system (this is observed by the recent riots and looting),
- A weak prosecutorial system,
- Weak and dysfunctional licence centres fraught with corruption and bribery,
- A weak and dysfunctional rail network system,
- High levels of crime, had it not been for private security companies, SA would be a place of hell, like Mexico, Somalia, to name a few,

In the political landscape, we've sadly witnessed too many Pop up or popcorn political leaders who's only interest is 'what's in it for them - WIIFM' or their political parties and NOT 'what's in it for the ELECTORATE!

SA is at a political crossroads for voters come 2024 election. Either we change direction as a country and rid ourselves of political hegemony and a one-Party State or we ALL suffer the consequences of democracy having failed us.

Change can only occur at the ballot box by the efforts of YOU our fellow citizens who come in their numbers to vote CIASA to ensure CHANGE for a new direction for our country, where All SA'ns prosper, Not just an elitist politically connected few!

This requires COURAGE of CONVICTION.

Change is INEVITABLE!

CHANGE is NOW!

CHANGE must HAPPEN!

SA, this beautiful land we ALL call home, is a country for ALL SA'ns, Black & White, not just for one section of society.

We ask that you VOTE CIASA

Make Conservatives in Action your choice, Choose CIASA

God Bless South Africa

God Bless it's people,
